USER MANUAL

CONTENTS

- TELiG Unit
- Power Cord
- Quick Start Guide

SETUP

1. 4FF SIM Card Installation

a) Remove the 4 screws on the back of the device with a T10 TORX bit

b) Install the SIM cards into the SIM slot(s)

See Video ▶

2. Connect Antennas

3. Connect Power Supply to Power Cord

4. Connect Power Cord (green block) to front panel

5. Turn on Power Supply

CONNECTING TO WEB ADMIN

1. Connect ethernet cable from your PC to ETHERNET 1 (front panel)

2. Configure the ethernet interface on your laptop to be **10.0.0.100/24**.

3. With a web browser, navigate to **https://10.0.0.1**. Confirm the security exception if it is presented (this is a self-signed certificate used by the TELiG's web server)

4. Admin credentials are set up for each unit based on the last *6 digits* of the unit serial number:

a) User: **root**

b) Password: `Council_Rock_SECRET_######`

5. At the login screen, enter your credentials.

6. For each SIM card installed, an Access Point Name (APN) must be configured.

a) Navigate to Network **> SIMs**

b) Note the interface for each SIM in the General Info section

c) In the APNs section, use the text boxes listed under the corresponding interface to enter each SIMs APN.

d) Click **SAVE & APPLY**

7. The unit should display a solid green light and be ready to use

TECHNICAL SUPPORT

If you are having difficulty with setup, verify that:

- The unit is receiving power
- Power, RF and data connections are secure
- The unit's configuration (primarily IP address) is correct

Refer to the User Manual for further details on unit configuration and troubleshooting.
